

OREGANO [ORIGANUM VULGARE]

Oregano (scientific name *Origanum vulgare*) is a common species of *Origanum*, a genus of the mint family (*Lamiaceae*). It is native to temperate western and southwestern Eurasia and the Mediterranean region.

Oregano is a perennial herb, growing from 20–80 cm (7.9–31.5 in) tall, with opposite leaves 1–4 cm (0.39–1.57 in) long. Oregano will grow in a pH range between 6.0 (mildly acidic) and 9.0 (strongly alkaline), with a preferred range between 6.0 and 8.0. The flowers are purple, 3–4 mm (0.12–0.16 in) long, produced in erect spikes. It is sometimes called wild marjoram, and its close relative *O. majorana* is known as sweet marjoram.
